# Taiwan Employment Outlook

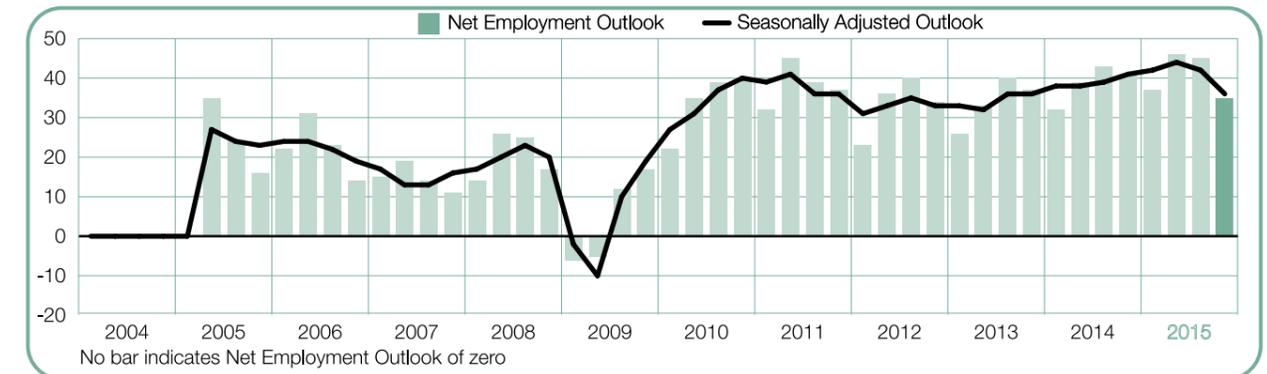

The Manpower Employment Outlook Survey for the fourth quarter 2015 was conducted by interviewing a representative sample of 1,125 employers in Taiwan. All survey participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of December 2015 as compared to the current quarter?”

## Taiwan Employment Outlook

	Increase	Decrease	No Change	Don't Know	Net Employment Outlook	Seasonally Adjusted
	%	%	%	%	%	%
<b>Oct-Dec 2015</b>	<b>40</b>	<b>5</b>	<b>53</b>	<b>2</b>	<b>+35</b>	<b>+36</b>
July-Sep 2015	47	2	49	2	+45	+42
Apr-June 2015	49	3	47	1	+46	+44
Jan-Mar 2015	40	3	53	4	+37	+42
Oct-Dec 2014	43	2	53	2	+41	+41

Employers report bright hiring prospects for the October-December time frame. With 40% of employers expecting to increase staffing levels, 5% forecasting a decrease and 53% anticipating no change, the resulting Net Employment Outlook is +35%.

Once the data is adjusted to allow for seasonal variation, the Outlook stands at +36%. Hiring intentions weaken both quarter-over-quarter and year-over-year, declining by 4 and 5 percentage points, respectively. The resulting Outlook is the weakest reported since 3Q 2013.

Throughout this report, we use the term “Net Employment Outlook.” This figure is derived by taking the percentage of employers anticipating total employment to increase and subtracting from this the percentage expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook.

From this point forward, all data discussed in the commentary is seasonally adjusted, unless stated otherwise.

# Organization-Size Comparisons

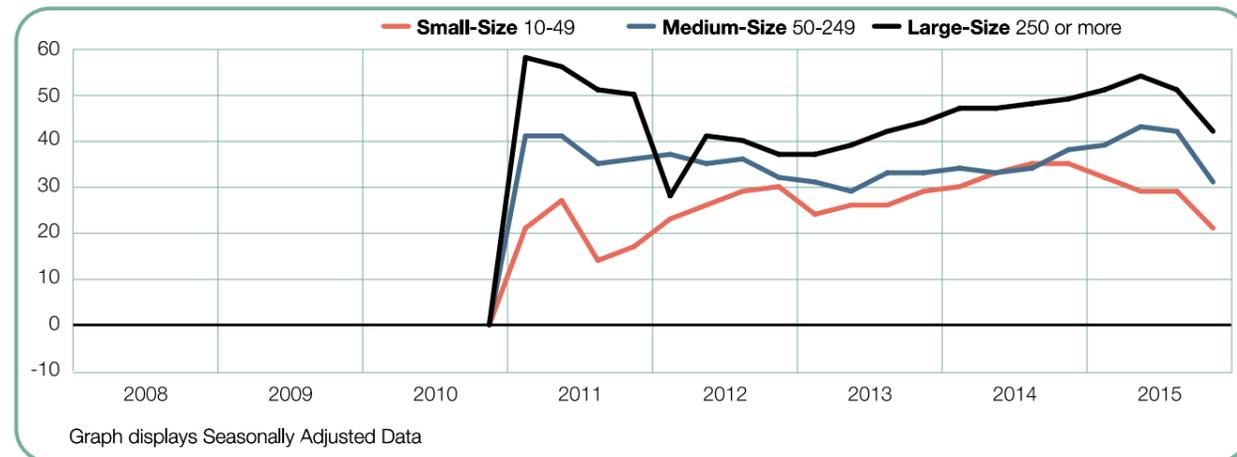

Participating employers are categorized into one of three organization sizes: Small businesses have up to 49 employees; Medium businesses have 50-249 employees; and Large businesses have 250 or more employees.

Employers in all three organization size categories forecast an increase in staffing levels during 4Q 2015. The strongest labor market is anticipated by Large employers who report a bullish Net Employment Outlook of +42%. Medium-size employers report bright hiring prospects with an Outlook of +31% while the Outlook for Small employers stands at +21%.

Quarter-over-quarter, hiring intentions weaken in all three organization size bands, most notably by 7 percentage points for both Small- and Medium-size employers. Large employers report a decrease of 5 percentage points.

Hiring plans also decline in all three categories when compared with 4Q 2014. Small employers report the most noteworthy decrease of 14 percentage points while Outlooks are 8 percentage points weaker for both Medium- and Large-size employers.

Organisation-Size	Increase	Decrease	No Change	Don't Know	Net Employment Outlook	Seasonally Adjusted
	%	%	%	%	%	%
<b>Small-Size</b> 10-49	25	4	69	2	+21	+21
<b>Medium-Size</b> 50-249	38	6	54	2	+32	+31
<b>Large-Size</b> 250 or more	46	5	46	3	+41	+42

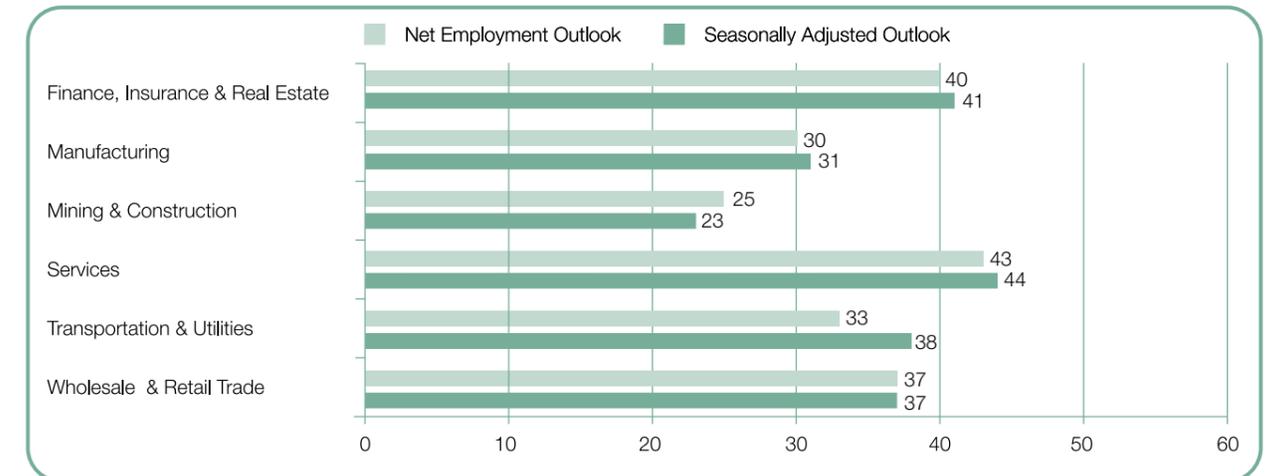

# Sector Comparisons

Payroll growth is anticipated in all six industry sectors during the next three months. Services sector employers report the strongest hiring prospects with a bullish Net Employment Outlook of +44%. A vigorous hiring pace is also forecast for the Finance, Insurance & Real Estate sector, where the Outlook stands at +41%. Elsewhere, prosperous hiring activity is expected in the Transportation & Utilities sector and the Wholesale & Retail Trade sector, with Outlooks standing at +38% and +37%, respectively, while the Manufacturing sector Outlook is +31%. The weakest sector Outlook of +23% is reported by Mining & Construction sector employers.

When compared with the previous quarter, Outlooks decline in five of the six industry sectors, most notably by 19 percentage points in the Mining & Construction sector. Manufacturing sector employers report a

decrease of 9 percentage points and the Wholesale & Retail Trade sector Outlook is 2 percentage points weaker. Meanwhile, the Outlook for the Finance, Insurance & Real Estate sector improves by 4 percentage points.

Year-over-year, hiring prospects weaken in four of the six industry sectors. The most noteworthy declines of 17 and 13 percentage points are reported in the Mining & Construction sector and the Manufacturing sector, respectively, while a decrease of 11 percentage points is reported by Finance, Insurance & Real Estate sector employers. However, hiring prospects improve in two sectors, with employers reporting increases of 4 and 3 percentage points in the Transportation & Utilities sector and the Services sector, respectively.

**+40 (+41)%**

## Finance, Insurance & Real Estate

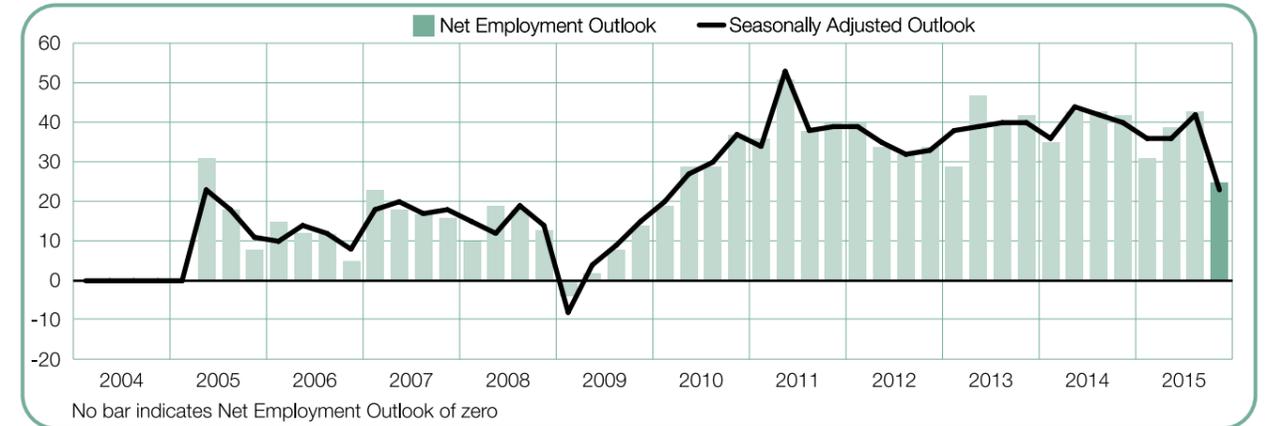

A booming labor market is forecast for the October-December time frame with employers reporting a Net Employment Outlook of +41%. Hiring prospects are 4 percentage points stronger when compared with the previous quarter but decline by 11 percentage points year-over-year.

**+25 (+23)%**

## Mining & Construction

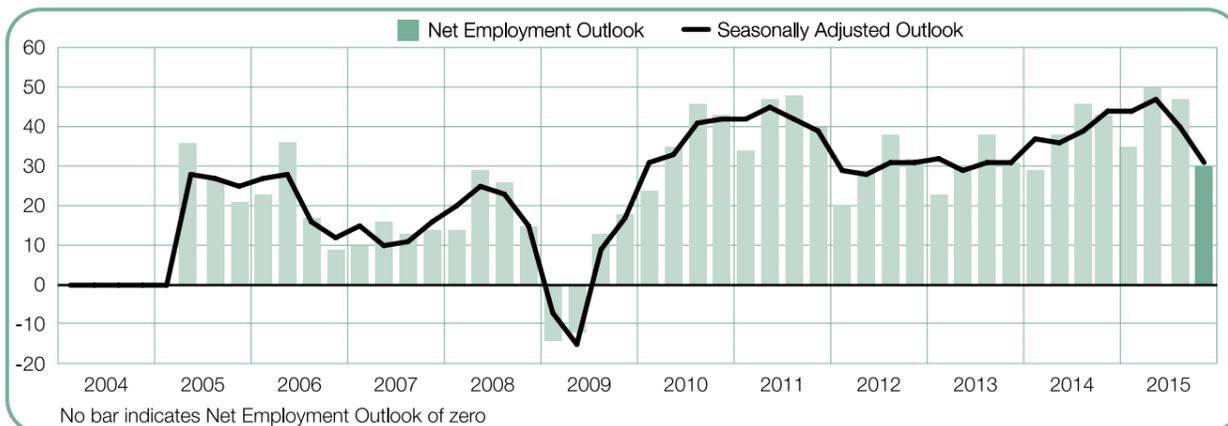

The weakest labor market since 1Q 2010 is anticipated in the coming quarter, with employers reporting a Net Employment Outlook of +23%. The Outlook is 19 percentage points weaker when compared with the previous quarter and declines by 17 percentage points year-over-year.

**+30 (+31)%**

## Manufacturing

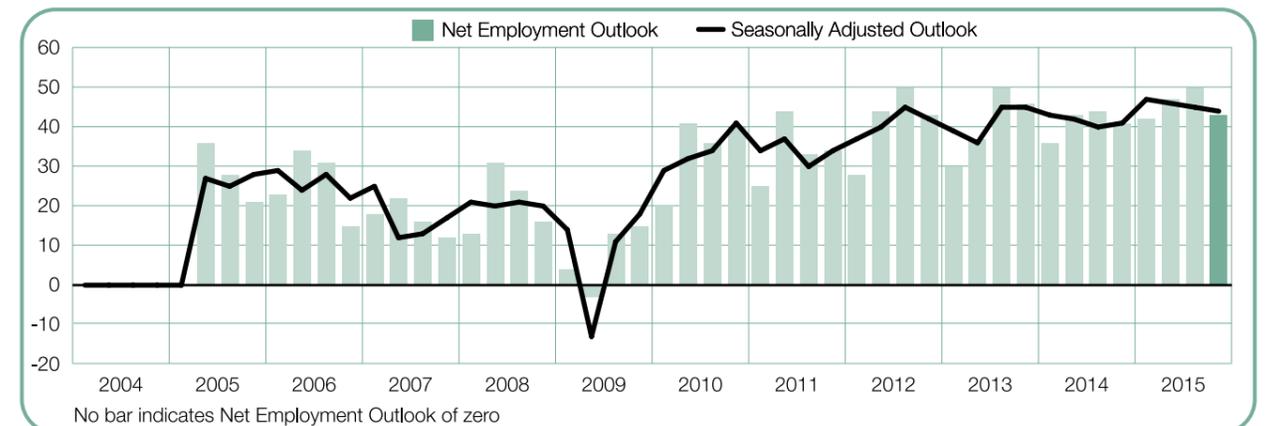

Job seekers can expect the weakest hiring pace since 4Q 2013, according to employers who report a Net Employment Outlook of +31% for the next three months. Hiring intentions decline considerably both quarter-over-quarter and year-over-year, decreasing by 9 and 13 percentage points, respectively.

**+43 (+44)%**

## Services

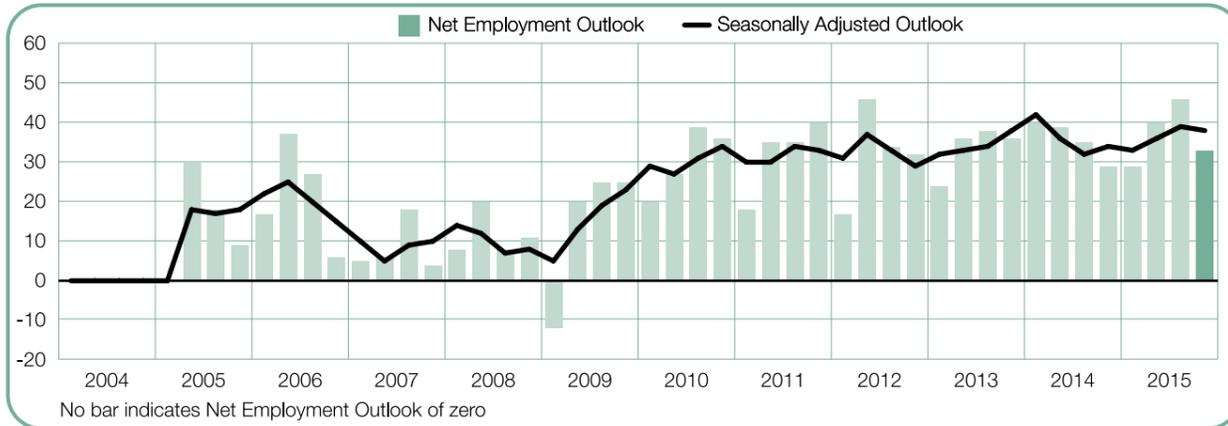

The dynamic hiring pace is forecast to continue in 4Q 2015 with employers reporting a Net Employment Outlook of +44%. When compared with the previous quarter, hiring prospects remain relatively stable, and employers report a year-over-year improvement of 3 percentage points.

**+33 (+38)%**

## Transportation & Utilities

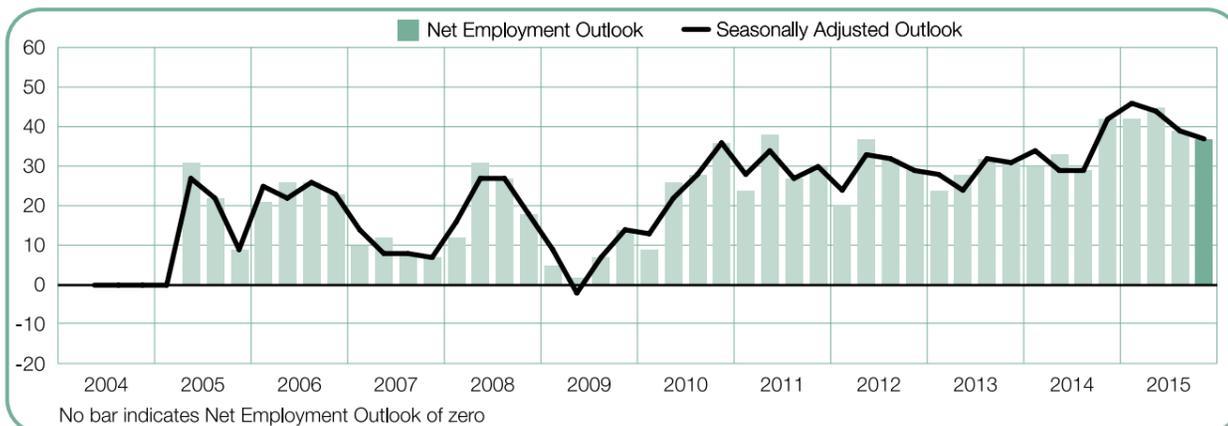

Employers report robust hiring plans for the upcoming quarter with a Net Employment Outlook of +38%. The Outlook remains relatively stable quarter-over-quarter and improves by 4 percentage points year-over-year.

**+37 (+37)%**

## Wholesale & Retail Trade

A bright hiring climate is forecast for 4Q 2015 with employers reporting a Net Employment Outlook of +37%. However, hiring intentions decline by 2 and 5 percentage points quarter-over-quarter and year-over-year, respectively.

<sup>1</sup> Number in parentheses is the Net Employment Outlook when adjusted to remove the impact of seasonal variations in hiring activity. Please note that this data is not available for all countries as a minimum of 17 quarters worth of data is required.

# Global Employment Outlook

ManpowerGroup interviewed nearly 59,000 employers across 42 countries and territories to forecast Quarter 4 2015 labor market activity.\* All participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of December 2015 as compared to the current quarter?”

Employers in 36 of 42 countries and territories intend to add to their payrolls by varying margins during the October-December time frame. However, evidence of definitive fourth-quarter workforce gains remains patchy amid signs that the pace of recovery following the recession continues to be slow and protracted. Many employers continue to exercise caution and are refraining from aggressive hiring until they sense more meaningful indicators of a market upturn.

Employers in India and Taiwan report the strongest hiring plans across the globe, while employer confidence in Japan is growing steadily with job seekers likely to benefit from the most optimistic forecast reported since Quarter 1 2008. Similarly, hiring intentions in the U.S. continue to improve, and the current outlook is the strongest reported since Quarter 4 2007.

Conversely, employer optimism continues to dwindle in Brazil; the fourth-quarter forecast is the weakest among the 42 countries and territories participating in the survey, and sinks to its least optimistic level since the survey was launched. Labor market activity is also slowing in China where employers forecast the weakest hiring environment in more than six years. Meanwhile, the forecast remains negative in Italy, and turns negative again in Greece, France and Finland.

Overall, employer optimism is mixed in comparison to the Quarter 3 2015 and Quarter 4 2014 research. Forecasts improve in a quarter-over-quarter comparison in 15 countries and territories, decline in 20 and are unchanged in seven. When compared year-over-year, forecasts improve in 16 countries, decline in 21, and are unchanged in five.

In the Europe, Middle East & Africa (EMEA) region, workforce gains are expected by employers in 19 of 24 countries. In a quarter-over-quarter comparison, opportunities for job seekers are expected to be

stronger in seven countries and weaker in 12. When compared to Quarter 4 2014, employer confidence is stronger in 12 countries and weaker in nine. Furthermore, among those countries where payroll growth is forecast, expected gains are mostly modest with employer optimism apparently tempered—at least in part—by issues associated with the most recent Greek debt crisis. The region’s most active hiring pace is forecast in Romania, while Italian employers again report the region’s weakest year-end hiring plans.

Payrolls are expected to increase in all eight Asia Pacific countries and territories. However, Outlooks are trending weaker and the hiring pace is expected to strengthen in only three of eight countries and territories quarter-over-quarter and improve in only one in a year-over-year comparison. Employers in India report the most optimistic forecast across the globe. Conversely, the region’s weakest forecast is reported by mainland Chinese employers where hiring activity dips to its weakest point since Quarter 3 2009, following quarter-over-quarter and year-over-year declines in all regions and in most industry sectors.

Of the 10 countries surveyed in the Americas, positive Outlooks are reported in nine. Hiring confidence strengthens in five countries and declines in four when compared to the July-September time frame. In a year-over-year comparison, forecasts strengthen in only three countries and decline in six. U.S. employers report the strongest fourth-quarter hiring plans. In contrast, employers in Brazil anticipate the weakest hiring pace, with negative forecasts reported by employers in all but one industry sector and in all regions.

Full survey results for each of the 42 countries and territories included in this quarter’s survey, plus regional and global comparisons, can be found at [www.manpowergroup.com/meos](http://www.manpowergroup.com/meos). The next Manpower Employment Outlook Survey will be released on 8 December 2015 and will detail expected labor market activity for the first quarter of 2016.

\* Commentary is based on seasonally adjusted data where available. Data is not seasonally adjusted in Finland.

# International Comparisons – Asia Pacific

Over 15,200 employers were interviewed in the Asia Pacific region. Employers in each of the eight countries and territories intend to add to their workforces in the next three months, but the hiring pace is expected to slow by varying degrees in half of the countries and territories in comparison to Quarter 3 2015 and decline in 6 when compared to Quarter 4 2014. The region’s strongest hiring plans are reported by employers in India, Taiwan and Japan, while those in China and Australia report the weakest.

Employers in India report the most optimistic forecast among the 42 countries and territories that participate in the survey. More than four of every 10 employers surveyed indicate they will add to their payrolls in the October-December time frame, and the outlook is buoyed by expectations of a dynamic hiring environment in all four regions surveyed in India and in most industry sectors.

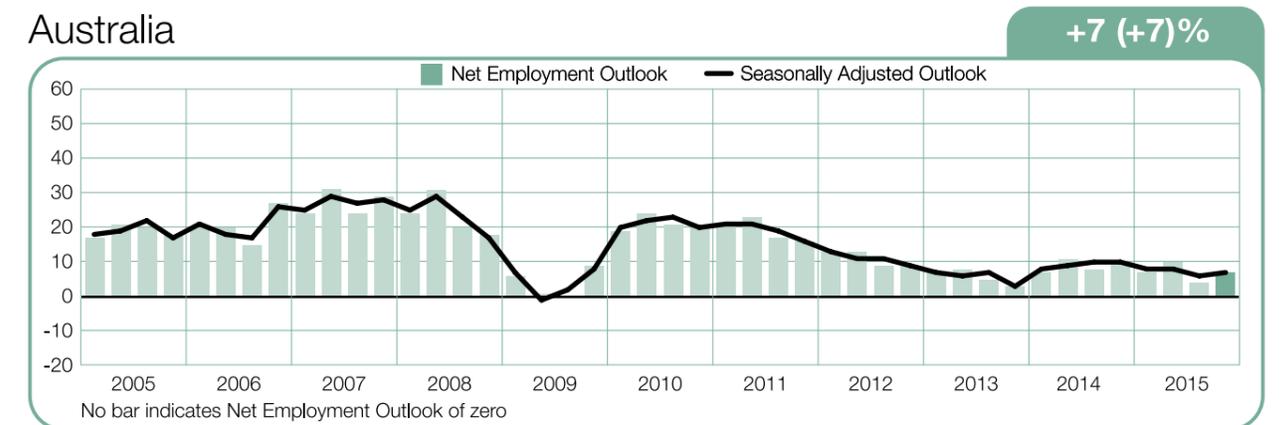

Hiring intentions in Taiwan dip by moderate margins when compared to the prior three months and last year at this time. But opportunities for job seekers are expected to remain bright through the end of December, and when compared to other employers across the globe optimism among Taiwanese employers is surpassed only by those in India. A vigorous hiring environment is expected in both the Services and the Finance, Insurance & Real Estate sectors. And even in the Mining & Construction sector where the forecast sinks to its weakest level since Quarter 1 2010, nearly three of every 10 employers intend to add to payrolls in the fourth quarter.

In Japan, the outlook stands at its strongest level since Quarter 1 2008. However, employer hiring plans continue to be frustrated by a lack of qualified candidates as Japan’s aging workers leave the workforce and shrink an already tight labor pool. The challenge remains particularly acute in the Mining & Construction and Transport & Utilities sectors where nearly three in 10 employers plan to add to their workforces once suitable candidates can be sourced.

In China, employer confidence remains cautiously optimistic with positive Outlooks reported in each industry sector and region. However, opportunities for job seekers are less abundant than in prior quarters. The transition to a services-based economy and the sharp downturn in infrastructure spending is resulting in a less active hiring environment, and labor market activity is expected to slow to a pace not seen since Quarter 3 2009.

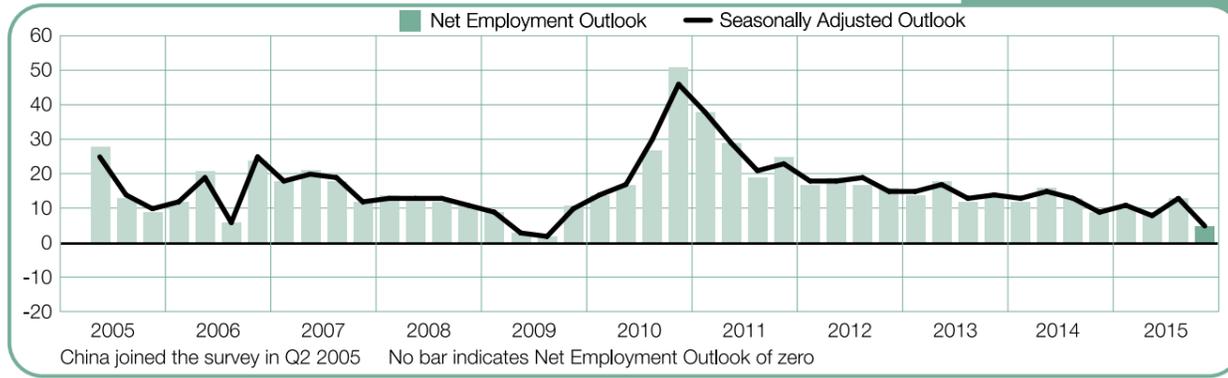

The hiring environment in New Zealand remains positive, but employers are scaling back hiring plans by considerable margins in comparison to last year at this time. Outlooks also weaken by considerable margins in six of seven industry sectors year-over-year, highlighted by sharp declines in the Services sector. Modest fourth-quarter hiring activity is expected in Australia where the ongoing impact of the slump in commodity prices is somewhat counter-balanced by the strongest Finance, Insurance & Real Estate sector in more than three years. Meanwhile, the hiring pace in both Singapore and Hong Kong is expected to remain steady with positive forecasts reported by employers in all industry sectors.

# International Comparisons – Americas

ManpowerGroup interviewed 23,444 employers in 10 countries throughout North, Central and South America to measure fourth-quarter hiring plans. Employers intend to add to their payrolls by varying amounts in all countries except Brazil. Forecasts are trending in mixed patterns when compared to the prior quarter with outlooks improving in five countries and declining in four. The year-over-year comparison suggests a marginally weaker trend with fourth-quarter forecasts declining in six countries.

For the second consecutive quarter employers in the U.S. report the region's most optimistic hiring plans with more than one in every five employers intending to add to their payrolls in the October-December time frame. Staffing level gains are forecast in each of the U.S. industry sectors and regions surveyed. The most active hiring pace is expected in the Leisure & Hospitality sector where nearly one-third of employers intend to add to their workforce in the next three months. Additionally, solid payroll growth is expected in the Wholesale & Retail Trade, Transport & Communications, and the Professional & Business Services sectors.

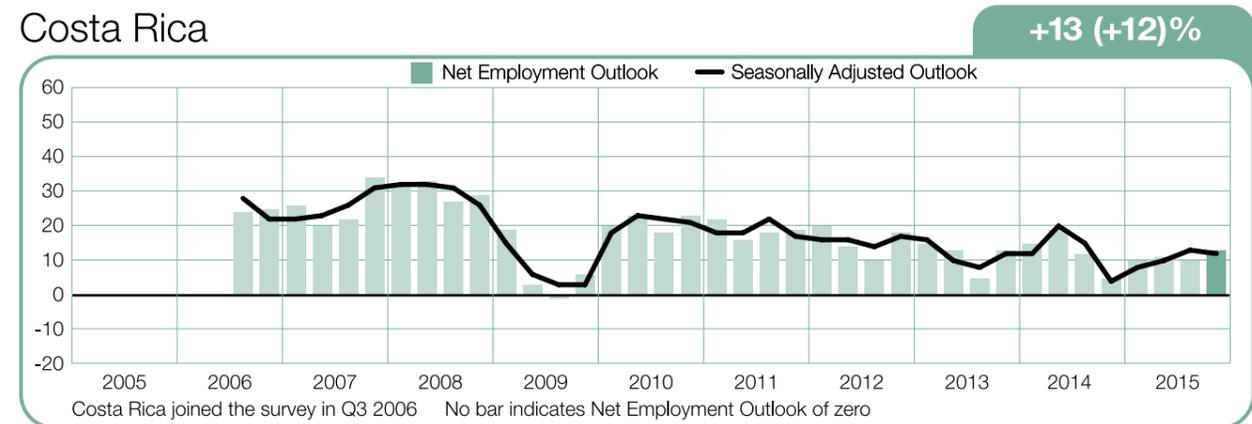

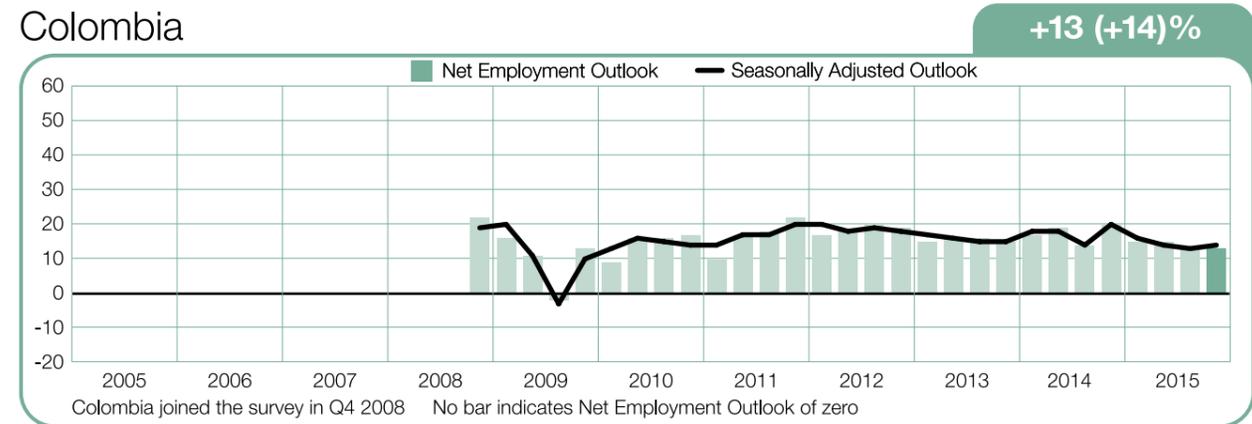

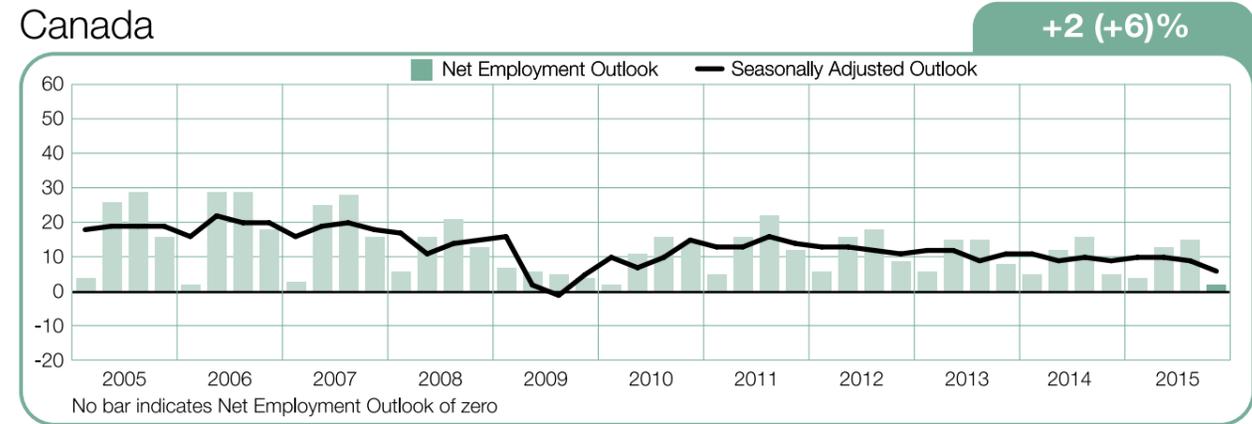

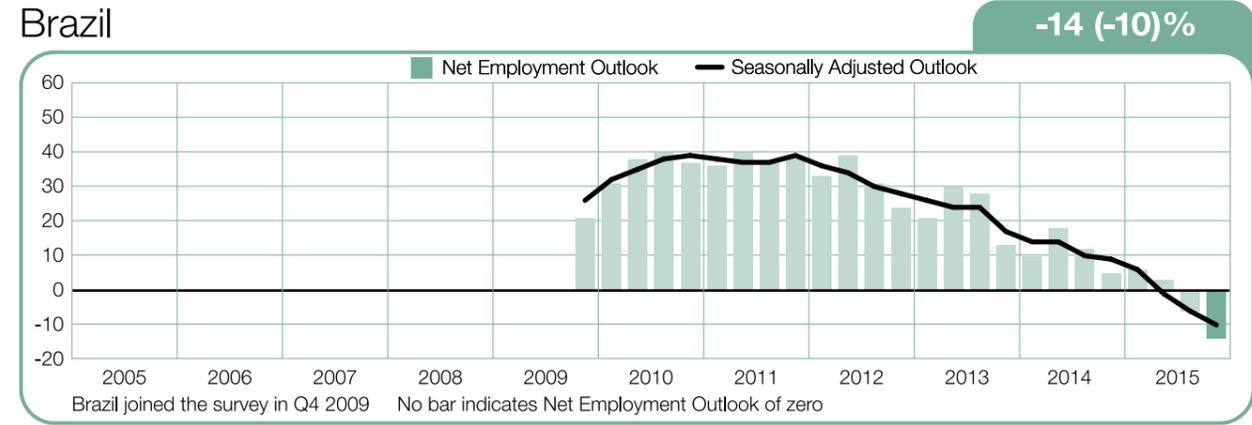

Colombian employers also anticipate a favorable fourth-quarter hiring environment. Outlooks point to workforce growth in all industry sectors and regions with the strongest job prospects reported in the Public Administration & Education and Services sectors.

Employers expect the hiring pace in Mexico to pick up slightly from three months ago. Positive forecasts are reported in each of the country's industry sectors and regions. The most optimistic forecasts are reported in the Manufacturing and Transport & Communications

sectors where one of every five employers say they intend to add staff in the months ahead. Workforce gains are also expected in Central America where employers in Costa Rica and Guatemala expect payroll growth in all industry sectors through the end of the year. Meanwhile, Panama's forecast remains positive, but employers report the country's weakest hiring plans since the survey was launched in Quarter 2 2010. The downturn is reinforced by the weakest forecasts to date in both the Commerce and Manufacturing industry sectors.

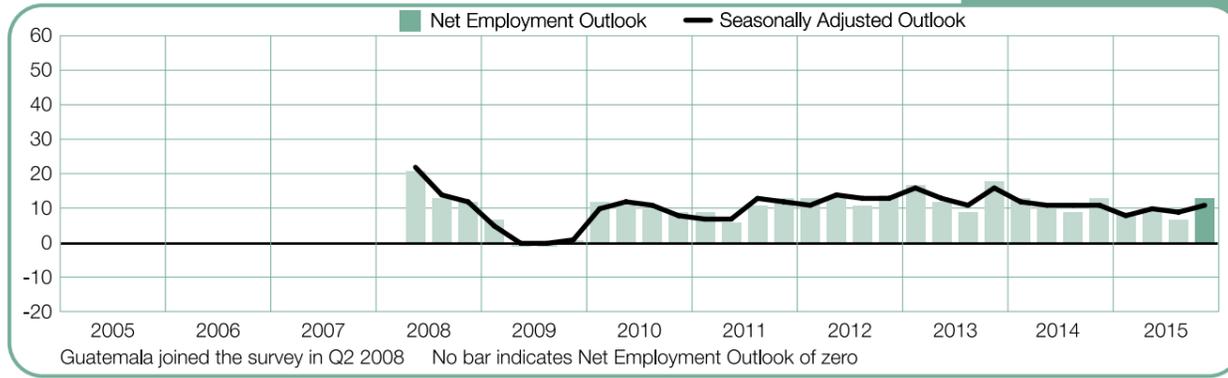

Elsewhere across the Americas, Canadian employers anticipate some opportunities for job seekers in the last three months of the year, but the country's outlook declines slightly in comparison to both Quarter 3 2015 and Quarter 4 2014. Confidence among Argentine employers has grown marginally stronger since the second quarter, and positive forecasts are reported in each of the country's industry sectors and regions. Similarly, employers in Peru expect to add to their workforces at a modest rate despite weaker year-over-year forecasts in six of nine industry sectors.

Employer confidence continues to deteriorate in Brazil. The country's Outlook declines to the weakest level since Brazil's survey was launched in Quarter 4 2009, and the hiring forecast has now been negative for three consecutive quarters. Outlooks also dip to their weakest levels since the survey's start in all regions and in all but one industry sector. Overall, nearly one in every four employers indicates they will reduce payrolls through the end of the year.

# International Comparisons – EMEA

More than 20,000 employers in 24 countries in the Europe, Middle East and Africa (EMEA) region were interviewed for the Quarter 4 2015 survey. Employers in 19 countries intend to add to their payrolls during the October-December time frame. However, there are signs that employers continue to harbor some concerns about the euro crisis in Greece. Forecasts improve in only seven countries in comparison to the Quarter 3 survey and decline in twelve, with Outlooks in Finland, France and Greece again slipping into negative territory. Year-over-year, employer confidence improves in 12 countries and declines in nine. And for the third consecutive quarter, employers in Italy report the region's weakest forecast.

The region's strongest hiring climate is reported in Romania, with solid job gains expected in the Manufacturing and Wholesale & Retail Trade sectors. Manufacturing is also key to the upbeat forecast in Turkey where nearly three of every 10 employers in the sector intend to add to their workforces through the end of the year.

German employers continue to report encouraging signs for job seekers. Hiring prospects remain relatively stable both quarter-over-quarter and year-over-year despite a moderate decline in the Manufacturing sector—one of the country's key employment drivers. Additionally, opportunities for job seekers are looking more upbeat in Hungary where employers report the country's most optimistic forecast since the survey was started in Quarter 3 2009.

Outlooks are positive in each of the UK's industry sectors, however the forecast softens in comparison to three months ago and last year at this time, with employers reporting weaker hiring plans in six of nine

industry sectors in both quarter-over-quarter and year-over-year comparisons.

Meanwhile, France's Outlook dips into negative territory, as employers apparently await the outcome of legislation designed to add flexibility to the hiring process. Employers in the Construction sector are also evidently content to delay hiring until government measures to boost infrastructure spending are finalized.

Prospects for job seekers in Ireland and Spain remain modest, but employers have now reported four consecutive quarters of positive hiring plans in the wake of a prolonged period of workforce contractions. On the other hand, employers in Greece have scaled back their hiring plans as a result of issues associated with the country's ongoing debt crisis, and the forecast turns negative following seven consecutive quarters of positive reports.

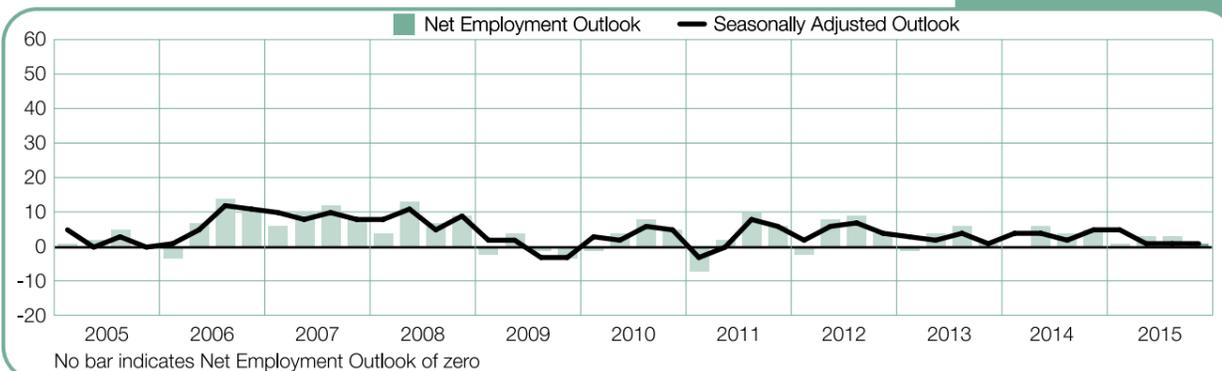

The hiring climate is mixed farther north with payrolls expected to grow at a slow pace in Norway and Sweden, and dip into negative territory in Finland, despite a considerable improvement in that country's Manufacturing sector outlook.

Opportunities for job seekers in Italy remain scarce and employer confidence continues to lag. Unemployment remains stubbornly high—especially among the country's youth—and the Outlook has now been mired in negative territory for 19 consecutive quarters, with payroll reductions expected to continue through the end of the year in all regions and in all but two industry sectors.

Additionally, employers remain cautiously optimistic in Israel and Slovakia where data for both countries has been seasonally adjusted for the first time.

## About the Survey

The Manpower Employment Outlook Survey is conducted quarterly to measure employers' intentions to increase or decrease the number of employees in their workforces during the next quarter. ManpowerGroup's comprehensive forecast of employer hiring plans has been running for more than 50 years and is one of the most trusted surveys of employment activity in the world. Various factors underpin the success of the Manpower Employment Outlook Survey:

**Unique:** It is unparalleled in its size, scope, longevity and area of focus.

**Projective:** The Manpower Employment Outlook Survey is the most extensive, forward-looking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

**Independent:** The survey is conducted with a representative sample of employers from throughout the countries and territories in which it is conducted. The survey participants are not derived from ManpowerGroup's customer base.

**Robust:** The survey is based on interviews with nearly 59,000 public and private employers across 42 countries and territories to measure anticipated employment trends each quarter. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information.

**Focused:** For more than five decades the survey has derived all of its information from a single question:

### Survey Question

For the 4Q 2015 research, all employers participating in the survey worldwide are asked the same question, "How do you anticipate total employment at your location to change in the three months to the end of December 2015 as compared to the current quarter?"

### Methodology

The Manpower Employment Outlook Survey is conducted using a validated methodology, in accordance with the highest standards in market research. The survey has been structured to be representative of each national economy. The margin of error for all national, regional and global data is not greater than +/- 3.9%.

### Net Employment Outlook

Throughout this report, we use the term "Net Employment Outlook." This figure is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook. Net Employment Outlooks for countries and territories that have accumulated at least 17 quarters of data are reported in a seasonally adjusted format unless otherwise stated.

### Seasonal Adjustment

Seasonal adjustments have been applied to the data for all participating countries except Finland. ManpowerGroup intends to add seasonal adjustments to the data for Finland once the requisite amount of historical data has been compiled. Note that in Quarter 2 2008, ManpowerGroup adopted the TRAMO-SEATS method of seasonal adjustment for data.
